END-TO-END SYSTEM FLOW & TESTING WALKTHROUGH

Interactive Team Guide

Scope: All 4 Roles Lifecycle
Version: 2.0.4 · October 2026

Use this guide to test the full lifecycle of an order with your groupmates. Assign each member a role (Admin, Customer, Staff, or Rider) and follow the steps below sequentially.

1 Admin — Station Setup & Catalog Verification

ROLE: ADMIN

Goal: Verify product catalog pricing, active time slots, and team user accounts.

1. **Verify Products (`admin/products.html`):** Click **Add Product**. Test the 2 categories:
   - **Water Refill (with Swap):** Test the 3-way price calculator. Setting Swap Price (₱25) + Empty Price (₱125) automatically calculates New Gallon Price (₱150).
   - **Empty Container Only:** Verify selling clean spare bottles outright (e.g. ₱125.00). Notice 100% zero emojis.
2. **Verify Time Slots (`admin/time-slots.html`):** Ensure delivery time windows are active with daily capacity.
3. **Verify Team Accounts (`admin/users.html`):** Confirm your groupmates' Staff and Rider accounts are active.

2 Customer — Order Placement & Auto-Swap Check

ROLE: CUSTOMER

Goal: Place an order using automatic container swap detection.

1. Navigate to **`customer/new-order.html`**.
2. Select a saved delivery address and preferred delivery time window.
3. Select a **Water Refill**:
   - **If the customer holds empty bottles:** The system defaults automatically to **Swap (₱25.00)**.
   - **If customer balance is 0 or orders extra:** The system defaults to **Water + New Gallon (₱150.00)**.
   - *(Optional)* Add a standalone **Empty Gallon Only (₱125.00)**.
4. Click **Place Order (Cash on Delivery)**.
5. You are redirected to **`customer/track-order.html`**. Live status displays: **`Order Placed · Pending station confirmation`**.

> **Double-Swap Guard:** While this order is pending, the customer's committed containers are reserved so they cannot accidentally place duplicate swaps exceeding their physical bottles.

3 Staff — Confirmation, Refill & Rider Dispatch

ROLE: STAFF

Goal: Confirm the order, execute the refill queue, and assign an active rider.

1. Open `staff/orders.html` → find the order under the **Pending** tab.
2. Click **Confirm Order** (Staff may adjust the delivery slot if necessary). Status transitions to `Confirmed`.
3. Go to `staff/order-processing.html`:
   - Click **Start refill** → status updates to `Refilling`.
   - When physical filling finishes, click **Mark ready** → status updates to `Ready`.
4. Return to `staff/orders.html` → under **Ready for Dispatch**:
   - Select your groupmate's Rider from the dropdown and click **Assign Rider**.
   - Order status updates to `Rider Assigned`.

4 Rider — Transit, Doorstep 1-to-1 Swap & Cash Collection

ROLE: RIDER

Goal: Start transit, enforce 1-to-1 swap at the door, and record COD collection.

1. Open **`rider/my-deliveries.html`**:
   - Review the vehicle trip manifest (total gallons to load) and route stop sequence.
   - Click **Start delivery** (or **Depart station with batch**). Status becomes **`Out for delivery`**.
   - *(Notice: The Customer's `track-order.html` screen live-updates to "Out for delivery" in real time!)*
2. Upon reaching the customer address, click **Complete delivery** (opens `rider/complete-delivery.html`):
   - Notice the automatic counts: **Bottles delivered** matches the order, and **Empties collected** matches eligible swaps.
   - Leave **Payment received (Cash on delivery)** checked.
3. Click **Submit delivery record** → order transitions to **`Delivered / Completed`**.

> **Exception Flow:** If customer is unreachable, rider clicks `Cannot Deliver / Report Issue`. Status becomes `attempted` and the customer can reschedule from their portal.

5 Rider & Staff Handshake — Cash Remittance & Register Settlement

ROLE: RIDER ROLE: STAFF

Goal: Turn over collected physical cash and reconcile the station cashier register.

1. **On the Rider Screen (`rider/my-deliveries.html` or `rider/delivery-history.html`):**
   - The green card **Cash in Hand (Unremitted COD)** displays the total collected cash (e.g. `₱150.00 · 1 completed order`).
   - Click the button: **`Turn over & remit cash (₱150.00)`** →.
   - An itemized modal appears showing the Order #, Customer, Date, and Cash amount.
   - Click **Confirm Cash Turnover**.
   - The rider's Cash in Hand resets to **`₱0.00 (All cash remitted to station)`**.
2. **On the Staff Screen (`staff/orders.html` → Remittance Tab):**
   - Staff views the rider's card in the Remittance tab showing the turnover recorded and marked settled.

6 Customer — Order Receipt & Bottle Ledger Verification

ROLE: CUSTOMER

Goal: Confirm completed order history, receipt generation, and container balance.

1. Navigate to **`customer/order-history.html`**.
2. The order appears under the **Completed** tab with a green badge.
3. Click **View Receipt** to inspect itemized pricing, discounts, and delivery charges.
4. Check the customer's bottle balance: container hold is updated accurately based on the completed swap!

Summary Table of Order Status Transitions

STATUS	ACTOR	ACTION / TRIGGER	NEXT STATE
pending	Customer	Places new order on `customer/new-order.html`	Staff confirms
confirmed	Staff	Staff clicks "Confirm Order" on `staff/orders.html`	Refilling started
refilling	Staff	Staff clicks "Start refill" on `staff/order-processing.html`	Mark ready
ready	Staff	Staff clicks "Mark ready"	Rider assigned
rider_assigned	Staff	Staff assigns available rider	Trip started
out_for_delivery	Rider	Rider clicks "Start delivery" on `my-deliveries.html`	Delivery completed
delivered / completed	Rider	Rider enters bottle count and records COD payment	Cash remitted
remitted	Rider / Staff	Rider turns over cash; balance resets to ₱0.00	Order fully closed
